

Salem Elatrash

DATA & TECHNOLOGY GRADUATE | SOFTWARE ENGINEERING | MACHINE LEARNING

Dublin, Ireland | Connect via LinkedIn

linkedin.com/in/salem-elatrash | github.com/Slooma951

PROFILE

MSc Data Analytics student and TU Dublin Computing graduate seeking a 2027 role in data, software or technology. Built and published a writing-support Chrome extension with a Python API, and developed a mobile lost-property platform. Comfortable turning user needs into tested software, preparing data and explaining technical work clearly.

EDUCATION

MSc Data Analytics | National College of Ireland | Sep 2026 - Aug 2027 (expected)

Statistics and Optimisation; Data Mining and Machine Learning; Analytics Programming and Data Visualisation; Data Governance, Ethics and Sustainability.

BSc (Honours) Computing (Information Technology) | TU Dublin | completed Jun 2026

Data Structures and Algorithms; Databases and SQL; Software Engineering; Software Testing; Operating Systems.

EXPERIENCE

MC9 Gaming | Volunteer Developer and Technical Support | Jan - Oct 2025

Developed Lua and JavaScript scripts, reproduced server faults, documented issues and helped users resolve technical problems.

TU Dublin | Volunteer Student Ambassador | through Jun 2026

Taught HTML, CSS, JavaScript and Python at a coding camp for children; represented Computing at open days, demonstrated coursework and explained the course to prospective students and families.

An Post | Seasonal Peak Assistant, Dublin | Oct 2025 - Jan 2026

Sorted high-volume mail and parcels accurately during the Christmas peak while following operational and safety procedures.

PROJECTS

Scribevo / WordFlow | Writing-support extension and ML research

- Published a Chrome extension in May 2026 with a JavaScript client and Python FastAPI service; packaged the backend with Docker and added health checks.
- Prepared a 6,571-pair dataset and fine-tuned a T5-based research prototype; tested with four participants. In a 200-example offline rules-only benchmark, a punctuation fix reduced harmful edits from 22% to 3%.
- Added 248 Python and 69 JavaScript automated tests in CI to protect release quality.

Reunio / Retrace | Lost-property mobile and backend prototype

- Built an Expo/React Native app and FastAPI/PostgreSQL backend for listings, search, claims and staff review.
- Developed matching logic that ranks loss reports against found items and explains each suggestion; 61 automated tests cover matching, returns, retention and photo scan.
- Implemented server-verified JWT identity, tenant-scoped API access and row-level security; 88 backend tests passed locally.

TECHNICAL SKILLS

Programming and data: Python, SQL, JavaScript, TypeScript, Lua, pandas, NumPy, PostgreSQL, MySQL.

Software: FastAPI, REST APIs, React Native, Expo, HTML/CSS, Docker, Git, GitHub Actions, pytest, Linux.

Machine learning: PyTorch, Hugging Face Transformers, NLP, dataset preparation and model evaluation.

Languages: English and Arabic (fluent).
